This will be only two cases-

a) Do not bribe, be at the ith position wherever you are
b) Bribe and move ahead
   1)Being at initial i^{th} position, valid current position after bribe can be $(i-1)^{th}$ position
   2)Being at initial i^{th} position, valid current position after bribes can be $(i-2)^{th}$ position
   3)Too chaotic (trying to bribe more than 2 people which is ahead of you)
